

DZAKY DHIYA UL-HAQ

(+62)81262922998 • dzakydhiyaulhaq88@gmail.com • www.linkedin.com/in/dzaky-ul-haq/

Banda Aceh, Aceh, Indonesia

SUMMARY

Fresh Graduate in Computer Engineering from Syiah Kuala University with expertise in Machine Learning, Deep Learning, Front-End Development, and UI/UX Design. Experienced in developing AI-driven applications, image classification systems, and web-based interfaces. Proficient in Python, TensorFlow, JavaScript, HTML, CSS, and Figma. Passionate about applying innovative technologies to build intelligent, efficient, and user-centered solutions while continuously expanding technical and professional skills.

EDUCATION

Syiah Kuala University - Banda Aceh, Aceh, Indonesia

July 2022 - Aug 2026

- Bachelor of Computer Engineering, GPA: 3.28/4.00
- Thesis: Analysis the Effect of Data Splitting on EfficientNet-B0 Model Performance in Down Syndrome Facial Image Classification.

WORK EXPERIENCES

Bank Syariah Indonesia (BSI) KCP Lampriet Banda Aceh

Aug 2025 - Sep 2025

Branch office of Bank Syariah Indonesia providing Islamic banking services and digital financial solutions.

Machine Learning Intern

- Developed and evaluated a sentiment analysis model using Python to analyze customer and public opinions.
- Conducted data collection, preprocessing, feature engineering, and model performance evaluation.
- Generated actionable insights from textual data to support decision-making and service improvement.
- Prepared technical documentation, analyzed results, and presented findings to support project objectives.

ORGANIZATIONAL EXPERIENCES

Head of Interest and Talents Division - HIMATEKKOM

Mar 2025 - Jan 2026

Syiah Kuala University

- Led a team in planning and executing student development programs and organizational events.
- Coordinated project activities, delegated responsibilities, and monitored program outcomes.
- Collaborated with stakeholders to support event execution and community engagement.

Member of the Interest and Talents Division - HIMATEKKOM

Mar 2023 - Jan 2025

Syiah Kuala University

- Contributed to the organization and implementation of student activities and talent development programs.
 - Assisted in event planning, coordination, and participant engagement.
 - Worked collaboratively with team members to achieve organizational objectives.
-

PROJECTS

Data Splitting Strategies for Down Syndrome Facial Classification: Dec 2025 - Mar 2026
A Comparative Study Using EfficientNet-B0 and MobileNetV2

Research Project

- Conducted a comparative study of EfficientNet-B0 and MobileNetV2 for Down Syndrome facial classification.
- Investigated the impact of different data splitting strategies on model performance and generalization capability.
- Evaluated models using accuracy, precision, recall, F1-score, and inference efficiency metrics.
- Developed and trained deep learning models using Python and TensorFlow/Keras.

HerbDry: IoT-Based Herbal Leaf Drying System Aug 2025 - Dec 2025

Hardware Software Co-Design Project

- Developed an IoT-based system for automated herbal leaf drying.
- Integrated sensors for monitoring temperature, humidity, and leaf weight in real time.
- Designed a web-based interface for remote monitoring and management.
- Improved drying efficiency and reduced the need for continuous manual supervision.

Tourism Application Development Jun 2024 - Oct 2024

PPK Ormawa Project

- Developed features for a tourism application designed to promote local destinations and tourism services.
- Implemented responsive user interfaces and collaborated with team members during application development.
- Assisted in testing, debugging, and optimizing application performance.
- Contributed to project documentation and deployment preparation.

PUBLICATIONS

SKILLS

- **Programming:** Python, JavaScript, HTML, CSS, TypeScript, React, Flutter,
- **Machine Learning:** TensorFlow, Keras, Scikit-learn, Computer Vision, Deep Learning
- **Frontend Development:** HTML, CSS, JavaScript, Responsive Design
- **Data Analysis:** Pandas, Numpy
- **Tools:** Git, GitHub, Google Colab, Visual Studio Code, Vercel, Arduino IDE
- **Design:** Figma, Canva
- **Languages:** Indonesian (Native), English (Intermediate)
